**Description:** The transmission shifter cable could separate, disconnecting the transmission shifter from the transmission, which could result in the inability of the driver to shift the transmission potentially resulting in the gear shift lever position not matching the transmission gear.

If the transmission shifter becomes disconnected from the transmission, the vehicle may not perform the shifts intended by the driver. Unintended vehicle movement may occur which can cause a vehicle crash without prior warning and/or injury to others.

**Remedy:** FCA US will conduct a Voluntary Safety Recall to replace the transmission shift cable.

## CARFAX Glossary

**Commercial**
Vehicle was registered for business purposes.

**First Owner**
When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

**Manufacturer Recall**
Automobile manufacturers issue recall notices to inform owners of car defects that have come to the manufacturer's attention. Recalls also suggest improvements that can be made to improve the safety of a particular vehicle. Most manufacturer recalls can be repaired at no cost to you.

**Ownership History**
CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.
